PORTFOLIO
mohammed-ibdah.vercel.app

TECHNICAL SKILLS

FRONTEND
React.js, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Design

BACKEND
Node.js, Express.js, REST APIs, JWT Auth

DATABASE
PostgreSQL (Drizzle ORM), MongoDB

LANGUAGES
JavaScript (ES6+), TypeScript

TOOLS
Git, GitHub, Docker, Vitest, Playwright, VS Code

BUSINESS SYSTEMS
QuickBooks, Foodics, Cloudbeds, LenovoHRM

EDUCATION

Bachelor's in Computer Science
Al-Balqa Applied University
Al-Huson University College
GPA: **3.30 / 4.00**
Graduated: February 2026

PROFESSIONAL SUMMARY

Full Stack Developer who builds complete web applications end to end with React, Node.js, TypeScript, PostgreSQL and MongoDB. Built Daftar, a bilingual (Arabic/English) platform with Stripe payments, cloud storage and automated tests, and an HRM system for employee management. Also brings hands-on experience with real business systems (QuickBooks, Foodics, Cloudbeds, LenovoHRM) across accounting, restaurant, hotel and HR workflows.

PROFESSIONAL EXPERIENCE

Data Entry & Business Systems Assistant — 2026 – Present

Al Methan Real Estate Management Company

- Entered and managed financial data in QuickBooks, including deposits, income, expenses, bills, and bill payments.
- Worked with Foodics restaurant management system to add and manage cashier items, create offers, and generate operational reports.
- Used Cloudbeds hotel management system for reservations, including check-in, check-out, payments, and reporting.
- Worked with LenovoHRM to manage employee information, working days and hours, absences, leave, and official holidays.

Freelance Full Stack Web Developer | Self-Employed — 2026 – Present

- Designed and delivered full-stack MERN applications for various clients, including booking systems and admin dashboards.
- Communicated directly with clients to gather requirements, iterate on feedback, and meet deadlines.
- Improved application performance and enhanced user experience through code reviews and optimization.

PROJECTS

Daftar – Digital Graduation Guestbook | React · TypeScript · PostgreSQL

- Built a bilingual (Arabic/English, full RTL) platform where graduates create a personalized notebook and share it by link or QR code for friends to leave messages.
- Designed a normalized 24-table PostgreSQL schema with Drizzle ORM and a modular Express + TypeScript backend.
- Integrated Stripe Checkout with server-side payment verification and S3-compatible file storage.
- Secured with JWT refresh-token rotation, CSRF protection, rate limiting and upload sanitization; tested with Vitest, Supertest and Playwright.
- Live: grad-book-web.vercel.app · Code: github.com/m7md-ib/gradBook

MAYS HR – HR & Payroll System | Next.js · TypeScript · PostgreSQL

- Built an HR and payroll system for employees, attendance, payroll, advances, leave and holidays, with exact money calculations (decimal.js) covered by unit tests.
- Role-based access for 6 roles, audit log, dashboard charts and Excel report export.
- Live: hr-system-pearl-mu.vercel.app · Code: github.com/m7md-ib/HR-System

E-Learning Platform | MERN Stack

- Built a full-stack e-learning platform supporting course creation, enrollment, and progress tracking.
- Implemented secure user authentication (JWT) and role-based access control.
- Designed a responsive UI with React.js.

Session Booking Website | MERN Stack

- Developed an end-to-end booking system enabling users to schedule and manage sessions.
- Integrated RESTful APIs with Node.js and Express and used MongoDB for persistent data storage.

Task Management Application | React / Node.js

- Created a task tracker with CRUD functionality and priority management.
- Implemented dynamic state management using React hooks.

Cashier / Point-of-Sale System

- Built a sales transaction and product management system focused on speed and usability for non-technical end-users.

Student Progress Tracking System

- Developed a system to monitor student achievements and performance across courses.
- Implemented structured data storage and automated reporting features.
