PROFESSIONAL SUMMARY

Junior Full Stack MERN Developer with hands-on experience building web applications using React.js, Node.js, Express.js, and MongoDB. Also experienced in working with business systems and operational data, including QuickBooks, Foodics, Cloudbeds, and LenovoHRM. Developed an HRM system and a digital graduation guestbook platform while gaining practical experience with financial, restaurant, hotel, and employee-management systems.

PROFESSIONAL EXPERIENCE

Data Entry & Business Systems Assistant
2026 – Present
Al Methan Real Estate Management Company

- Entered and managed financial data in QuickBooks, including deposits, income, expenses, bills, and bill payments.
- Worked with Foodics restaurant management system to add and manage cashier items, create offers, and generate operational reports.
- Used Cloudbeds hotel management system for reservations, including check-in, check-out, payments, and reporting.
- Worked with LenovoHRM to manage employee information, working days and hours, absences, leave, and official holidays.
- Gained practical experience working with business data and operational systems across accounting, restaurant, hotel, and HR workflows.

Freelance Full Stack Web Developer | Self-Employed

- Designed and delivered full-stack MERN applications for various clients, including booking systems and admin dashboards.
- Communicated directly with clients to gather requirements, iterate on feedback, and meet deadlines.
- Improved application performance and enhanced user experience through code reviews and optimization.

PROJECTS

HRM Management System
- Developed a complete HRM system for managing employee information, working hours, attendance, absences, leave, and holidays.

Daftar – Digital Graduation Guestbook
- Developed a digital graduation guestbook platform for graduates, focused on an interactive and responsive user experience.

E-Learning Platform | MERN Stack
- Built a full-stack e-learning platform supporting course creation, enrollment, and progress tracking.
- Implemented secure user authentication (JWT) and role-based access control.
- Designed a responsive UI with React.js.

Session Booking Website | MERN Stack
- Developed an end-to-end booking system enabling users to schedule and manage sessions.
- Integrated RESTful APIs with Node.js and Express and used MongoDB for persistent data storage.

Task Management Application | React / Node.js
- Created a task tracker with CRUD functionality and priority management.
- Implemented dynamic state management using React hooks.

Cashier / Point-of-Sale System
- Built a sales transaction and product management system focused on speed and usability for non-technical end-users.

Student Progress Tracking System
- Developed a system to monitor student achievements and performance across courses.
- Implemented structured data storage and automated reporting features.
